

The Solar Connections International PowerMount PMR1-S is your solution for S-style corrugated metal roof panel solar system attachments. Following in the footsteps of all other Solar Connections International products, this product is designed to simplify installation, considerably reducing your labor and installation costs. Its exceptional design was also created to incorporate the use of our Universal L-Foot, our Solar Connections Kit, as well as all other L-Foot designs and components needed within the industry. The pre-applied EPDM gaskets are incorporated to provide you with the utmost in watertightness, and protection for your S-style corrugated roof system applications. In addition, and being that it incorporates a majority of all S-style corrugated panels on the market, it is designed to eliminate the need to inventory multiple products, or carry additional SKUs for S-style corrugated metal roof panel installations.
